

# Be a STAR with TCP

## TCP ENERGY STAR CFL Fixtures

TCP is committed to providing high quality fixtures that are the benchmark in energy efficiency. TCP's compact fluorescent fixtures use 1/4 the energy of traditional lighting and produce 75% less heat.

By selecting energy saving lighting, you will be working toward reducing your energy bills and significantly reducing greenhouse gases into our air. Saving energy prevents pollution. When less energy is used, greenhouse gas emissions in our atmosphere are reduced. If every home in America replaced the five light fixtures they use most with ENERGY STAR qualified models, we would collectively prevent greenhouse gases equivalent to the emissions of nearly 10 million cars.\*

Item Number	Item Description	Lamp Watts	Incandescent Comparison	Initial Lumens
<b>GU Ceiling Fixture, 120 Volts, 10,000 Hour Lamp life, 2700K</b>
