

LIGHTING for HOSPITALITY

Lighting solutions for the whole guest experience

lobby hallways bedrooms cafe lounge fitness center swimming pool offices

Because TCP LEDs last between 25,000 and 50,000 hours, guests will not be inconvenienced by lighting issues and will have a more pleasant experience.

Lighting for the Whole Guest Experience

Catering to Individuals

As the hospitality market continues to cater to the diverse needs of their guests, TCP is mindful of specification trends.

We provide over 500 LED options to fit most hospitality applications.

Adaptation and Guest Comfort

TCP has a wide variety of LED color temperature options and lumen packages to help you provide the correct lighting for each application. This will help your guests' eyes to adjust between the light levels in their rooms to the hallways, corridors and lobby.

Flexibility for a Changing Market

TCP is equipped to quickly respond to the changing needs of the hospitality market. We understand what goes into quality lighting because of our rich history in energy efficient lighting.

COMPATIBILITY

Full Circuit Testing

It is vital to fully load the circuit when performing controls or dimming compatibility testing. By fully loading the circuit during lamp testing, TCP helps avoid future compatibility issues.

SAFETY

Whether you are lamping the back of the house or guest areas, TCP will help you reach appropriate light levels for each application.

"A room is like a stage. If you see it without lighting, it can be the coldest place in the world."

— Paul Lynde

HOSPITALITY DESIGN

TRENDS

Last 15,000 hours

Aesthetic Choices

Because TCP knows how important lighting aesthetics are in the hospitality industry, we have many styles of decorative lamps, including vintage **LED dimmable filaments**.

CLASSICS FILAMENT LED LAMPS

Unique filament LED configuration provides a uniform color output with smooth uniform dimming from 0-100%.

THE GOOD LIFE

Filament LEDs with Warm Dimming

Unique filament LED configuration provides a true warm dimming performance from 3200K to 1800K.

Light Level Options

DIMMABLE

TCP has many dimmable LED options, including Allusion "incandescent-like" LEDs—offering a unique dimming profile, that replicates true incandescent/halogen dimming. These lamps are perfect for hospitality applications that rely on setting the mood.

Last 25,000 hours

3-WAY LEDs

TCP has a 3-Way LED to give guests even more control over the light levels in their rooms, while still giving them the quality and comfort of LED.

Last 25,000 hours

40/60/100W
Dimmable 3-Way

Sleek and Slim

STARLIGHT LED LAMPS

The Starlight product features a sleek and slim design without compromising on light output and quality. It's futuristic shape will fit a galaxy wide variety of applications—from pendants to sockets and everything in between.

Last 30,000 hours

Smooth Warm Dimming

ALSO AVAILABLE

- Custom color housings
- Matching color pendant mounts

"Think of lighting design as being in three layers. table lamps are at eye height for task lighting, chandeliers or ceiling fixtures for ambient lighting and track lights or spotlights for decorative lighting."

"It's all about creating the right mix for establishing that perfect mood in each room."

GUEST LIGHTING

A P P L I C A T I O N S

With over 500 choices of LED lamps, fixtures and options for various hospitality applications, TCP makes it easy to develop an energy-efficient, human-centric lighting plan. This allows you to maximize light layering for comfort and functionality. For detailed product information and specs visit tcp.com.

SOL

Like natural sunlight without the harsh UV found in other LEDs

Coming Soon!

Products in the lineup will include A-lamps, BRs, Starlights, Downlights, Flat Panels and T8 lamps.

The Q-Sol line of LED products utilize advanced LED chip designs to allow these lamps to mimic the characteristics of natural sunlight without harsh UV or blue spikes found in other LED sources. This allows users to enjoy better visual comfort which provides an increase in focus and ability to pay attention to detail. These lamps have a high R9 value which allows an increase in contrast when comparing colors. Since these lamps do not have the blue peak and mimic natural sunlight they have been proven to provide better sleep cycles for users.

Experience shapes how guest feel about the hotel, and it creates loyalty.

AFFORDABLE

TCP will work within your **budget** to help you create a solid lighting plan.

FAST ROI

Look for TCP **ENERGY STAR**® rated products for qualifying rebates.

SUSTAINABLE

Energy efficient TCP LEDs have a **long life**, which increases over-all sustainability.
