## Please read instructions before proceeding with installation. **0-10V DIMMING**
Precautions:

1. **Do not touch or press LEDs against any surface as this can cause damage. Damaged LEDs may not light and can disrupt the flow of power.**

2. **DANGER—RISK OF SHOCK—DISCONNECT POWER BEFORE INSTALLATION!**

3. Handle fixture with care to avoid possible cuts or abrasions from exposed edges. TCP suggests using work gloves when installing fixture.

4. Check fixture for cuts or loose connections which could have occurred during shipment. If any are found, they must be repaired before proceeding.

5. To help reduce the risk of electric shock, TCP strongly recommends using a sturdy wooden or fiberglass ladder and rubber soled shoes during the installation of the fixture.

6. This product must be installed in accordance with National Electrical Code (NEC) and/or applicable local codes, by a qualified licensed electrician.

7. Fixture must be grounded.

8. Be certain wire nuts are tight and no bare wires are exposed outside of the wire nuts. If needed, wrap in electrical tape.

Wiring Instructions

Wire Nut

Wire Nut

Line In

Connect black wire from power supply to black disconnect lead and secure with wire nut.

Connect white wire from power supply to white disconnect lead and secure with wire nut.

Wire Nut

Connect green ground from power supply to green ground in housing and secure with wire nut
