

The background is a dark field filled with a dense pattern of semi-transparent squares in various shades of green and teal. A bright, glowing light source is positioned on the left side, creating a starburst effect and illuminating the squares, which appear to recede into the distance.

# Elite Fluorescent High Bay T8/T5

## DESCRIPTION

Elite's full body assembly accommodates multiple optics utilizing either T5 or T8 lamps. The heavy-duty 20 gauge housing exceeds code gauge steel, and all components are post painted with a glossy, high reflectance white paint. Sockets include secure, positioning rotating collars.

## APPLICATION

Elite's superior lumen package is ideal for replacing traditional high bay systems. Benefits include high efficiency, 95% lumen maintenance, improved color rendering, extended lamp life, multi-level switching, instant on, dimming and improved uniformity. Suggested mounting heights from 15' - 40' for primary applications, including "Big Box" retail, warehousing, commercial facilities, manufacturing facilities, open and stack aisle applications.

## REFLECTOR OPTICS

The superior beam spread optic covers from narrow aisle lighting to open area general lighting. The Elite is available using a specular aluminum (SA) Miro®4 or a white aluminum (WA) reflector, which have a 25 year warranty. The reflector options include uplight or non-uplight, depending on the application.

## ELECTRICAL

All ballasts are Class P rated and UL/cUL Listed. Our ballasts are also thermally protected, sound rated and tightly secured by mounting bolts, as well as NEMA Premium and CEE qualified.

## FINISH

The baked white enamel finish is electrostatically applied and post painted with a glossy, highly reflective and durable white paint.

# Stairwell T8

## DESCRIPTION

The Stairwell T8 was designed for energy savings using efficient T8 ballasts and lamps in conjunction with an ultrasonic sensor. The attractive two or three lamp design uses an ultrasonic occupancy sensor to turn off the main T8 lamp(s) while there are no occupants in the area, maintaining operation of one T8 lamp during standby mode for safety and compliance purposes. An emergency ballast can also be specified to provide light for 90 minutes in the event of a power failure. This will ensure there is enough light in areas designated as emergency egress.

## APPLICATION

The Stairwell fixture is a great choice when looking for a bi-level luminaire, which provides energy savings, high efficiency, 95% lumen maintenance, improved color rendering, extended lamp life, instant on and improved uniformity. Suggested mounting heights up to 16' for primary applications, including stairwells, restrooms, laundry rooms and other areas where maximum light levels are not needed on a constant basis.

## CONSTRUCTION

The Stairwell fixture is constructed of heavy-duty 20 gauge steel, which is post painted with a baked white enamel finish that is electrostatically applied. Ample knockouts are provided for wiring and mounting. The white perforated steel diffuser uses one piece of UV stabilized acrylic to provide an even light distribution pattern. Sockets include secure, positioning rotating collars.

## ELECTRICAL

All electrical components are UL/cUL Listed. Ballasts are Class P rated, thermally protected, sound rated, NEMA Premium, CEE qualified and secured by mounting bolts. The sensor is a low voltage ultrasonic sensor with adjustable sensitivity and time delays of 5, 10, 15 or 30 minutes. A built in LED lights up, when occupancy is detected. The sensor has functions for testing, overriding "on" and an integrated 72 hour burn-in feature to ensure long lamp life and proper operation.

# Wet/Damp Location Fluorescent T8/T5

## DESCRIPTION

Wet Location's full body assembly accommodates either T8 or T5 lamps. The gasketed enclosure is constructed of a fiberglass upper body and acrylic diffuser, with a continuous poured gasket. The diffuser and upper components are locked by retaining latches, which ensures a tight seal. Sockets include secure, positioning rotating collars.

## APPLICATION

The Wet Location fixture is IP65 and IP67 rated, dust and moisture-resistant, making it ideal for harsh environments where humidity or moisture is present.

Primary applications include the following:

- Food Processing Facilities
- Kitchens
- Public Areas
- Subways
- Schools
- Parking Garages
- Gas Stations
- Government Facilities
- Industrial Facilities

## REFLECTOR OPTICS

The superior beam spread optics are ideal for an open area, general lighting. The Wet Location fixture comes standard with a white channel cover (WA), and is available using a specular aluminum (SA) Miro®4 Reflector, which has a 25 year warranty.

## ELECTRICAL

All ballasts are Class P rated and UL/cUL Listed. Our ballasts are also thermally protected, sound rated and tightly secured by mounting bolts, as well as NEMA Premium and CEE qualified.

## FINISH

The finish is white with fiberglass housing.

# Power Cage Fluorescent High Bay T8/T5

## DESCRIPTION

Power Cage's full body assembly accommodates multiple optics utilizing either T5 or T8 lamps. The heavy-duty 20 gauge housing and 8 gauge wireguard is code gauge steel and all components, excluding the wireguard, are post painted with a glossy, high reflectance white paint. Sockets include secure, positioning rotating collars.

## APPLICATION

Power Cage's superior lumen package is ideal for replacing traditional metal halide high bay systems. Benefits include high efficiency, 95% lumen maintenance, improved color rendering, extended lamp life, multi-level switching, instant on, dimming and improved uniformity. Suggested mounting heights from 15' - 40' for primary applications, including warehousing, commercial facilities, manufacturing facilities open and stack aisle applications.

## REFLECTOR OPTICS

The superior beam spread optic covers from narrow aisle lighting to open area, general lighting. Power Cage is available using a specular aluminum (SA) or a white aluminum (WA) reflector, which have a 25 year warranty.

## ELECTRICAL

All ballasts are Class P rated and UL/cUL Listed. Our ballasts are also thermally protected, sound rated and tightly secured by mounting bolts, as well as NEMA Premium and CEE qualified.

## FINISH

The baked, white enamel finish is electrostatically applied and post painted with a glossy, highly reflective and durable white paint.

ARRA Qualified

### GENERAL:

Once receiving the fixture, thoroughly inspect for any freight damage, which should be brought to the attention of the delivery carrier. Compare the catalog description listed on the packing slip with the fixture label on the housing to assure you have received the correct product.

### SAFETY:

This fixture must be wired in accordance with the national electrical code and applicable local codes and ordinance. Proper ground wiring is required to insure personal safety. Carefully observe grounding procedure under installation section. All work should be done by a qualified electrician.

### RISK OF FIRE:

#### DO NOT USE IN HAZARDOUS CLASSIFIED LOCATIONS.

Failure to do so could result in explosions and fire.

TO BE INSTALLED BY A QUALIFIED ELECTRICIAN ONLY.  
USE SUPPLY WIRE RATED MINIMUM 90°C.

### WARNING:

**Make certain power is OFF before starting installation or attempting any maintenance.**

### DIRECTIONS:

1. Hub Connector Bottom piece will come attached to fixture. Please make sure the Hub Connector Bottom is tightly fastened to the fixture, as it might become loose during transit.
2. Thread Hub Connector Top piece (box with 3/4" threading) on 3/4" conduit or other approved supporting means.
3. Slide Hub Connector Bottom, which is attached to the fixture, through the Hub Connector Top, which is attached to 3/4" conduit or other approved supporting mean.
  - **NOTE:** Make sure when sliding the Hub Connector Bottom piece onto the Hub Connector Top that the screw tab is exposed for the Hub Connector Plate.
4. Connect proper supply voltage lead to proper fixture voltage lead. Connect common leads. Connect ground (green) wire to suitable grounding. Use wire nuts or other approved connector for all electrical connections.
  - **WARNING:** Improper wiring may result in ballast failure and fire. Improper wiring voids warranties.
5. Carefully fold electrical leads into the Hub Connector Box. Slide Hub Connector Plate thru the slots of the Hub Connector Top grooves. Tighten screw into plate screw hole.
