

LED Solistic Lamps

The Solistic line of LED products utilize advanced LED chip designs to allow these lamps to mimic the characteristics of natural sunlight without harsh UV or blue spikes found in other LED sources. This allows users to enjoy better visual comfort which provides an increase in focus and ability to pay attention to detail. These lamps have a high R9 value which allows an increase in contrast when comparing colors. Since these lamps do not have the blue peak and mimic natural sunlight, they have been proven to provide better sleep cycles for users.

Reasons to choose LED Solistic Products from TCP

- Unique LED chips utilized in Solistic products provide a more natural light appearance that mimics the sun
- Increased ability for users to focus and sleep
- Eliminates the blue peak found in other LED lighting sources
- Glare and flicker free
- Increased energy savings over traditional fluorescent tubes
- Starlight Crossover design can be used in lamp or fixture applications
- Type A and Type B T8 product configurations
- R9 >95

Ideal Applications

- Office Spaces
- Retail Applications
- Schools
- Restaurants
- Lobbies
- Hospitals

Specifications

Color Temperatures.....3000K, 4000K, 5000K
Input Line Voltage:
T8.....120-277V
Starlight.....120V
Input Line Frequency.....50/60HZ

Lamp Life (Rated) 50,000 hours
Minimum Starting Temp -22°F/-30°C
Maximum Operating Temp.....45°C
CRI >97
Type B.....Single Ended
